NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

IT skills pay succumbs to economic conditions, posting first overall decline since mid-2004.

But pay still rising for architecture, methodology/process, database, security, networking/communications, and project management skills and certifications.

Vero Beach, FL, January 27, 2009 – Pay premiums for IT skills, which have risen consistently every calendar quarter since mid-2004, have finally succumbed to a fractured economy, according to the latest quarterly update of Foote Partners' *IT Skills and Certifications Pay Index™* of pay for 354 skills and certifications earned by 22,550 IT professionals in the US and Canada.

The average market value for 179 noncertified IT skills dropped 0.5 percent in the last three months of 2008 compared to the prior quarter despite continued pay gains in three key categories: **Management/Methodology/Process; Database;** and **Messaging and Communications** skills. Meanwhile, average pay for 175 IT certifications continued its steady decline that began in 2006, losing another 1 percent in the same period and nearly 5% for the year. There, too, were key significant gains in pay in three certification groups: **Architecture/Project Management; IT Security;** and **Networking.**

“It was inevitable for skills pay to start reflecting the hard times we’re in. This is not the first time in ten years tracking skills and certifications pay and demand that we’ve seen corrections brought on by economic conditions,” notes David Foote, the firm’s co-founder, CEO and Chief Research Officer. “But the big

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

difference this time around is the counter-trending, especially in architecture and methodology and process skills. We've never seen anything quite like this before.

“Clearly, an urgent demand for talent in these areas is eclipsing broad, knee jerk reactions to reducing budgets and cutting people, projects and purchases without thinking carefully about the consequences. There are a lot of factors driving this behavior, but all in all it just shows how far IT management has come since they were in this position last time. A very positive thing to see in some very negative conditions in our opinion.”

Continues Foote, “The fact is that employers made mistakes in past downturns---huge miscalculations in the heat of cost cutting--- that hurt them later on. Or should I say that limited their options when the smoke cleared and they were without the experience and specialized skills needed to rebuild the business. Employers are obviously now aware that continuing to invest strategically in IT skills and labor is the smartest thing they can possibly do to make it to the other side of this recession as stronger, undiminished enterprises. They've learned that it's not how much or how little they can getting away with spending and still maintain equilibrium during economic downturns: It's about how smart they're spending what they have. This is one of the true measures of leadership for senior IT and business executives alike, in good or bad times.”

For example, increasing process efficiency through the adoption of software automation and workflow tools is a popular recession budget strategy in 2009, evidenced by *sharp increases in pay and demand for ITIL, CoBIT, and similar expertise* tracked in Foote Partner's survey that are highly valued in facilitating process standardization and change management. While valuable in short range cost reduction initiatives, these are also core enterprise skills with high re-use value long term.

Similarly, with the anticipated escalation in recession-driven mergers and acquisitions creating an enormous amount of integration-related activity, IT architecture and project management expertise are in more demand than ever. “Nothing has been hotter than architecture jobs and skills in the last few years according to our trends research,” notes Foote. “This includes system, network, application, data, information, infrastructure, security, solutions, and, of course, enterprise architects. They will still be hot commodities long after the economy improves. But staffing and talent development in this area does not come easy or cheap. Most employers are well behind the curve. Even those who have invested heavily will tell you that they need more architects. Is this a time to throw up your arms and stop spending on architecture? Absolutely not! You can't afford *not* to rearrange your budget to continue investing what dollars you have in building this kind of

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

capability. The benefits are not just long range, as some believe,” insists Foote. “They are right here, right now.”

Summary of Findings

Our analysis of the latest *IT Skills and Certifications Pay Index™ (ITSCPI)* data and findings will be released in cascading new releases in coming weeks. What follows in this first release of findings is detailed data on individual skills and certifications that have increased, decreased, or maintained the same market value in the near term (3 to 6 months), and by how much.

What is clear from comparing 3-month and 6-month pay performance trends is that there has been a predictable acceleration of activity caused by major events including the collapse of capital markets, financial institutions, and optimism about the future. This has impacted skills pay and demand dramatically, reordering priorities in skills investment, and resulting in increases as well as decreases in investment in individual skills and entire categories. Subsequent news releases from Foote Partners will provide our analyses of these shifting priorities from a big-to-small picture perspective; by industry; by size of enterprise.

What IT skills are increasing/decreasing in value?

Growth or decline in pay for a skill reflects a changing gap between supply and demand for that skill. As a rule, growth indicates demand exceeding supply and will fluctuate over time as supply grows to meet demand. By analyzing the fluctuations in pay performance for a single skill over various time periods, inferences can be made about the market for that skill. Combined with other information---vendor strategies, competitive forces, and customer attitudes and behaviors, for instance---understanding what’s occurring in the current market and formulating projections into the future is possible.

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

A. Noncertified IT Skills Pay/Demand Trends (data through 1/1/2009)

Noncertified IT skills pay performance findings from the 4Q 2008 edition of the *2009 IT Skills and Certifications Pay Index™* appear in Figures 1 - 5.

1. HIGHLIGHTS – By Skills Category (noncertified)

These skill groups have **increased in value** in the corresponding time periods (listed in decreasing order of growth):

Last 3 months (through 1/1/09):

1. Management, Methodology & Process skills
2. Database skills
3. Messaging and Communications

Last 6 months (through 1/1/09):

1. Management, Methodology & Process

These skill groups have **decreased in value** in the corresponding time periods (listed in decreasing order of decline):

Last 3 months (through 1/1/09):

1. Applications Development Tools & Language skills
2. SAP & Enterprise Applications skills
3. Operating Systems skills
4. Web/eCommerce skills
5. Systems/Networking skills

Last 6 months (through 1/1/09):

1. Operating Systems skills
2. Applications Development Tools & Language skills
3. Web/eCommerce skills
4. Systems/Networking skills
5. SAP & Enterprise Applications skills

These skill groups had **no change in value** (i.e. flat) in the corresponding time periods

Last 3 mos: (none)

Last 6 mos:

1. Messaging and Communications skills
2. Database skills

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

3 and 12 Month Pay Trends by Category – Noncertified IT Skills (through 1/1/09)

(% Change in Average Median Pay for a Single Noncertified IT Skill)

3. Highest Paying IT Skills (Noncertified)

These **noncertified IT skills** were earning the highest pay premiums in descending order, within categories) (surveyed through 1/1/09 - Foote Partners 2009 *IT Skills and Certifications Pay Index™*)

RANGE: Average premium pay at median is 11% to 17% of base salary (for single skill)

Systems/Networking Skills

1. Security (various, project-based)
2. Network security management
3. SAN/Storage Area Networking
4. Virtualization (various)
5. Infrastructure architecture
6. Wireless network management (LANs, GSM)
7. VoIP/IP telephony

SAP/Enterprise Business Applications Skills

1. SAP ERP (multiple skills)
2. NetWeaver BI (SAP BW)
3. SAP Solution Manager
4. SAP MDM (Master Data Management)
5. Oracle Enterprise Apps
6. SAP HCM (SAP HR)
7. SAP Controlling (CO)
8. SAP Financial Accounting (FI)
9. SAP Netweaver Applications Server
10. SAP Web Application Server
11. SAP CRM (Customer Relationship Management)
12. SAP PLM (Product Lifecycle Management)
13. SAP WM(Warehouse Management)
14. SAP SEM (Strategic Enterprise Management)
15. SAP BW(BI) Accelerator
16. SAP FI - FSCM (Financial Supply Chain Management)
17. SAP WM - EWM (Extended Warehouse Management)
18. SAP IM (Investment Management)

Applications Development Tools and Platforms skills:

1. NetWeaver
2. RAD/Extreme Programming/Agile Programming
3. Oracle Developer Suite
4. Business Objects

Web/eCommerce Development skills:

1. Microsoft .NET (Visual Studio .NET, Visual Basic .NET, ASP.NET)
2. AJAX (Asynchronous JavaScript and XML)
3. Microsoft Commerce Server

Database Skills

1. Oracle DB / 8i/9i/10g/11i
2. Microsoft SQL Server
3. Database management
4. Master data management

Management, Process and Methodology Skills

1. Business process management/modeling/improvement
2. Business intelligence
3. Project management
4. CRM
5. ERP

Messaging and Communications Skills

1. Unified communications/messaging

B. IT Certification Pay/Demand Trends (data through 1/1/2009)

IT certifications pay performance findings from the 4Q 2008 *IT Skills and Certifications Pay Index™* update appear in Figures 6 - 19.

1. HIGHLIGHTS – By IT Certification Category

These certification groups have **increased in value** in the corresponding time periods (listed in decreasing order of growth):

Last 3 months (through 1/1/09):

1. Architecture and Project Management certifications
2. Networking certifications
3. IT Security certifications
4. General/Beginners and Training-related certifications

Last 6 mos (through 1/1/09): :

1. Architecture and Project Management certifications
2. IT Security certifications
3. General/Beginners and Training-related certifications

These certification groups have **decreased in value** in the corresponding time periods (listed in decreasing order of decline):

Last 3 months (through 1/1/09):

1. Web Development certifications;
2. Applications Development/Programming Languages certifications;
3. Database certifications;
4. Systems Administration & Engineering certifications

Last 6 months (through 1/1/09)::

1. Web Development certifications
2. Systems Administration & Engineering certifications
3. Applications Development/Programming Languages certifications
4. Database certifications
5. Networking certifications

2. HIGHLIGHTS – By Individual Certification – Cont’d.

These individual skills have **decreased in value** in the corresponding time periods (in decreasing order of decline) – CONT’D. (**Note:** Certifications appearing in **red** displayed no change in last 3 months).

Last 6 months (through 1/1/09):

1. Microsoft Certified Systems Engineer +Internet
2. (tie) Prosoft Master CIW Designer
Microsoft Certified Desktop Support Technician
SAS Certified Base Programmer
3. Nortel Networks Certified Support Expert
4. (tie) Prosoft Master CIW Administrator
CompTIA Server+
Novell/Certified Novell Administrator
Novell/Master Certified Novell Engineer
5. (tie)IBM Certified Solutions Developer: WebSphere (all)
Cisco IP Telephony Support Specialist
6. (tie)Microsoft Certified IT Professional (all)
Prosoft Master CIW Web Site Manager
Novell/Certified Novell Engineer
Teradata Certified SQL Specialist
7. (tie) Novell Certified Directory Engineer
Cisco Certified Network Associate
CompTIA Network Technician
IBM Certified Database Administrator - DB2
SAS Certified Advanced Programmer
Novell Certified Instructor
Planet3 Certified Wireless Analysis Professional
8. Cisco Firewall Specialist
9. (tie) Sun Certified Programmer for Java Platform
Systems Security Certified Practitioner
10. (tie) Brocade Certified SAN Designer
IBM Certified Administrator - SOA Solutions:
WebSphere Process Server
11. (tie) IBM Certified Application Developer – Lotus Notes/Domino
Novell/Certified Internet Professional
12. Certified Information Systems Auditor (CISA)
13. (tie) Novell Certified Linux Engineer
Citrix Certified Administrator
Microsoft Certified Systems Admin: Security
14. (tie) IBM Certified Advanced Technical Expert - pSeries and AIX 5L
Planet3 Certified Wireless Network Trainer
HP/Certified Systems Engineer
Microsoft Certified Systems Administrator: Messaging
Cisco VPN Specialist
Cisco Advanced Wireless LAN Design Specialist
Cisco Wireless LAN Support Specialist
Cisco Advanced Wireless LAN Field Specialist
15. (tie) **Cisco Storage Networking Design Specialist**
Cisco Storage Networking Support Specialist
Cisco Unity Design Specialist
Microsoft Certified Systems Engineer: Messaging
16. (tie) **EMC Proven Professional Implementation Engineer – Expert**
IBM Certified SOA Solution Designer
17. Cisco Certified Voice Professional
18. (tie) Cisco Certified Security Professional
HP/Master Accredited Systems Engineer
19. Certified Information Systems Security Professional(CISSP)
20. GIAC Security Expert (GSE)

6-Month Pay Trends through 1/1/2009

(Certifications value decline)

Figure 10

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

3. Highest Paying IT Certifications

These **IT certifications** were earning the highest pay premiums in descending order, within categories) (surveyed through 1/1/09 - Foote Partners 2009 *IT Skills and Certifications Pay Index™*)

RANGE: Average median premium pay is $\geq 10\%$ (for single certification)

Applications Development & Programming Languages certifications

1. Microsoft Certified Solution Developer (MCSD)
2. Sun Certified Enterprise Architect for Java Platform

Database certifications:

1. Oracle DBA Administrator Certified Master (OCM)
2. Teradata Certified Master
3. Teradata Certified Application Developer
4. Teradata Certified Design Architect

Systems Administration & Engineering/NOS certifications

1. Citrix Certified Integration Architect (CCIA)
2. HP Master Accredited Systems Engineer (Master ASE)
3. Microsoft Certified Architect (MCA)

Networking/Internetworking

1. Cisco Certified Internetwork Expert (CCIE)
2. Cisco Certified Design Expert (CCDE)
3. SNIA Certified Storage Networking Expert
4. SNIA Certified Architect
5. EMC Proven Professional Technology Architect – Expert
6. Brocade Certified SAN(Fabric) Designer (BCSD)
7. Cisco Certified Design Professional (CCDP)
8. Cisco Certified Systems Instructor (CCSI)
9. Cisco Certified Voice Professional (CCVP)
10. Cisco IP Telephony Design Specialist
11. Avaya Certified Expert
12. Cisco Certified Internetwork Professional (CCIP)

Security certifications

1. Certified Information Security Manager (CISM)
2. GIAC Security Expert (GSE)
3. Information Systems Security Architecture Professional (ISSAP/CISSP)
4. Information Systems Security Engineering Professional (ISSEP/CISSP)
5. Information Systems Security Management Professional (ISSMP/CISSP)
6. Certified Information Systems Security Professional (CISSP)
7. GIAC Assessing Wireless Networks (GAWN)
8. Certified Information Systems Auditor (CISA)
9. Cisco Certified Security Professional (CSP)
10. GIAC .NET (GNET)
11. Security Certified Network Architect
12. Certification and Accreditation Professional (CAP)
13. Check Point Certified Master Architect (CCMA)
14. GIAC Certified Intrusion Analyst (GCIA)
15. GIAC Systems and Network Auditor (GSNA)
16. Planet3 Certified Wireless Security Professional (CWSP)
17. GIAC Certified Forensic Analyst (GCFA)
18. GIAC Securing Oracle Certification (GSOC)

Project Management & Architecture

1. IT Certified Architect (ITCA/Open Group)
2. Project Management Professional (PMP)

General/Beginner and Training

1. Microsoft Certified Trainer (MCT)

IT Skills and Certifications Pay Index™

Product Information

NEW December 2011 data update to this release now available: <http://bit.ly/sqiTVC>

ABOUT THIS RESEARCH

Foote Partners' primary research survey for tracking IT skills and professional certifications pay is the quarterly ***IT Skills and Certifications Pay Index™ (ITSCPI)***, first published in 1999 and updated every three months. 84,000 IT professionals in the 82 U.S. and Canada cities (1,960 organizations) are surveyed for IT salaries and skills pay earned for 354 certified and noncertified IT and management skills and certifications. Verified skills pay data for 22,550 IT workers has been included in the 2009 ITSCPI edition, compiled from data collected from October 1, 2008 to January 1, 2009.

Demographics of the participating organizations for our latest update are as follows, measured most appropriately for the type of business, by revenues, assets, total premiums and operating budgets:

- 13% of participating organizations have \$3 billion+ in sales/\$15+ billion in total assets
- 25% of participating organizations earn more than \$1 billion in annual revenues or more than \$3 billion in total assets
- 42% of participating organizations have \$500+ million in sales/\$1+ billion in total assets/\$500+ million in premiums/\$500+ million operating budget (government, educational, not-for-profit)
- 58% of participating organizations fall in the SMB (small-to-medium sized business) segment, generally defined as organization under \$500 million in sales.
- [Public sector] 5% have operating budgets of \$500 million or more, [nonprofit/educational sectors] 4% with operating budgets \$100 million to less than \$500million

ABOUT FOOTE PARTNERS

[Foote Partners LLC](#) is a Vero Beach, Florida based management consultancy and independent market research company founded in 1997 that provides pragmatic and forward-thinking advice about managing the modern IT professional workforce. Founded in 1997 and comprised of former Gartner, McKinsey & Company, Towers Perrin, and Wm. M. Mercer analysts and consultants, and former corporate HR, IT, and business executives, Foote Partners has been a thought leader and trusted advisor to more than 1,400 employers seeking improvements in managing IT's impact on their businesses and customers.

Headquarters: 4445 North A1A, Suite 246

- Verified IT skills pay survey data from 22,550 IT professionals
- Current data collected October 1, 2008 to January 1, 2009 (updated quarterly)
- Certifications Guide containing basic information about surveyed IT certifications (pre-requisites; costs; test content; lab requirements, etc.)
- Pricing: \$2,250 single edition; \$8,750 annual subscription

Definition of IT skills premium pay

- Pay that IT workers receive for possessing high-value IT and business skills used on the job
- Given in the form of a bonus, or embedded in base salary to adjust for the presence of a dominant vendor or technology central to job performance (examples: Oracle Database Administrator, Linux Systems Administrator, Unix Programmer, or ABAP Developer).
- Often used to adjust either base pay or total pay in situations where job title does not match actual on-the-job duties and responsibilities, and changing the job title is not an attractive option
- May be used as a reward, recruiting inducement, retention tool, or as a guide for creating consulting rate cards
